And the Total Value of EXPORTS in each Year; also the POPULATION of the UNITED KINGDOM in each Year."

(*Sir Stafford Northcote.*)

Ordered, by The House of Commons, *to be Printed*,
21 *July* 1863.

RETURN showing the Quantities and the Value, so far as it can be given, of the FOREIGN and COLONIAL GOODS Imported and Entered for Consumption in each of the Five Years 1840, 1852, 1860, 1861, and 1862; distinguishing between the following Classes of Goods, and giving the Total Value of each Class respectively:—I. Articles of Food, or in the nature of Food, including Living Animals, Corn, Fruit, Wine, Spirits, Tea, Coffee, Sugar, Tobacco, and other similar Articles; II. Raw Materials of Manufacture, including Raw Cotton, Wool, Silk, Flax, Hemp, Jute, Metals Unwrought, Hides, Caoutchouc, &c.; III. Articles used in Manufactures or Agriculture, not being Raw Materials, including Dyeing Stuffs, Manures, Oils, &c.; IV. Manufactured Articles, so far as they are enumerated; together with the Total Value of our IMPORTS of all kinds in each Year: in those Cases in which the computed Real Value cannot be given, the Quantities only to be stated.

Note.—The production of this Return has been attended with very considerable difficulty—first, because the system now in force for the ascertainment of the real value of the Imports was not established until the year 1854; and secondly, because, even under the operation of that system, there exists no provision for the separate valuation of the quantities of goods admitted to consumption.

For the removal of these obstacles, recourse has been had to a process necessarily involving an extensive series of retrospective calculations; the basis of such calculations, in the case of the earlier years 1840 and 1852, having been supplied by contemporary documents, embodying the average prices of a portion only, though a large portion, of the commodities imported in those years respectively.

The Return, though still in some particulars defective, has thus been brought as closely as possible into conformity with the Order of the Honourable House.

General Notes.

No allowance is made for the weight of the reels, cards, or papers on which tapes and lace are rolled or wound.

Hemp and linen tissues mixed with cotton, in which the latter does not exceed 1-3d part of the whole, will pay as linens according to their respective classes. If the cotton exceeds 1-3d the weight of the goods, the articles will pay according to the rates fixed for cotton tissues mixed with other materials.

Linen tapes mixed with cotton will pay according to the weight of the predominating material.

Tissues composed of linen and silk, the warp or weft of which being of one of the two materials, will pay on 4-5ths the duty of linens, and 1-5th the duty of silks. If a part of the warp or weft only be formed of one of the two materials, duty will be charged according to the rates fixed for the predominating material.

Tissues composed of linen and wool, the warp or weft of which being of one of the two materials, will pay on 3-5ths the duty of woollens, and on 2-5ths the duty of linens. If the warp or weft be only partly formed of one of the two materials, the tissue will not be considered as a mixed tissue, but will pay according to the rates fixed for the predominating material.

Tissues the warp or weft of which is composed solely of flax, hemp, wool, or silk, and having in the texture two of these materials, will pay the duty as stuffs of which the warp or weft is composed, whichever is subject to the highest rate of duty.

Woollen tissues, mixed exclusively with silk, the warp of which shall be of one of the two materials, will pay duty on one-third the weight as silk, and two-thirds as wool. If a part of the warp only is made of wool or silk, the tissues will not be considered as mixed tissues, but will be charged according to the weight of the predominating material.

Woollens mixed with flax or hemp—*See* notes to Linen manufactures.

Woollen tissues containing a mixture of cotton, in greater proportion than one-third of the whole weight, will pay as cottons.

Woollen cloths, entered without lists, will be charged 6% more than the duties above stated for cloths.

Woollen handkerchiefs, bordered or fringed with woollen plush, silk, or other materials, will pay the duty fixed for woollen handkerchiefs; but the fringes will pay according to the material of which composed.

(1.) Under this article comes only machinery fit for use; old machinery is regarded as wrought or cast-iron, or other metals and materials unmanufactured, and pays according to the corresponding paragraphs of the tariff.				
(2.) By appurtenances admitted free, with the machines, are intended all such parts of them as cannot be used independently, that is to say, that cannot be put to any kind of use, except with the machine imported, such as boilers, cauldrons, heaters, chimneys, balustrades, floors, staircases, corbels, suspenders for connecting axles, and other articles necessary for the fitting or working of the machine. Such appurtenances, if imported separately from the machine, not excepting steam boilers, pay duty as metal wares, according to the corresponding paragraph of the tariff (except those enumerated in para. (*w*)). Copper and other metallic gauze, &c., and the appurtenances of spinning mills, such as hollow or fluted cylinders, press-rollers, spindles, revolving straps, and cotton cords for spindles, are, in every case, free of duty. From the 1st January 1862, detached parts of agricultural implements are admitted into the southern ports of Russia free of duty.				
(3.) Ploughs, Russian ploughs, and all other implements of agriculture, are also admitted under this paragraph free of duty.				
(*y*) Reeds for weaving, of all sizes and descriptions, rods and shuttles for manufactories, iron teeth for heckles, heckles for flax and hemp, and cards for cloth, cotton, spinning, and other manufactories		Free		Free.
